

Recycling service

# Give me a second life

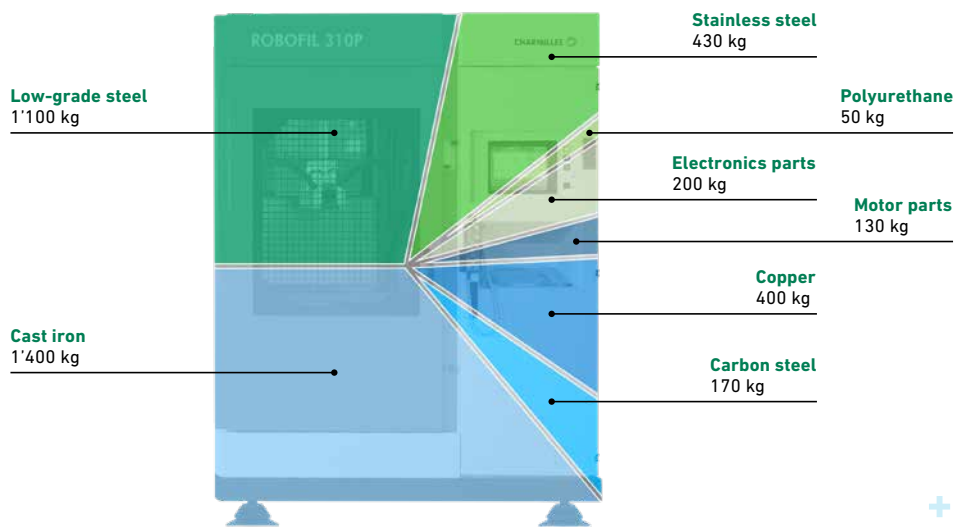

# How we recycle

As a responsible machine provider, GF Machining Solutions offers a pioneer recycling service:

1. Our experts inspect and evaluate the machine.
2. We buy it back and organize the pick up from your facility.
3. Our specialists disassemble it and sort the components.
4. A limited number of components can be refurbished, other materials are recycled, and the few that cannot be recovered are safely dismissed.

## An EDM machine contains on average

## Your reward

- An official certificate for every machine recycled will honor your participation.
- It will highlight the preserved resources and saved CO<sub>2</sub> emissions based on the avoided waste.
- You will free valuable space in your workshop, prevent additional costs and gain from the machine buyback.

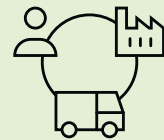

## Your benefits

### Safe

We guarantee full respect of safety rules and material treatment regulations throughout the entire process.

### Hassle-free

No worries about issues with the end of life of the machine, such as norms, certifications, logistics and operations.

### Environmentally sound

We ensure that a maximum of environmental benefits are achieved.
