

Liechti Powerful Solutions

Geometry Optimization

Increased blade geometry quality = Increased productivity and quality

This is why we offer a blade geometry optimization, done by a highly experienced Liechti applications engineer.

Within one working day, we'll optimize your blade geometry.

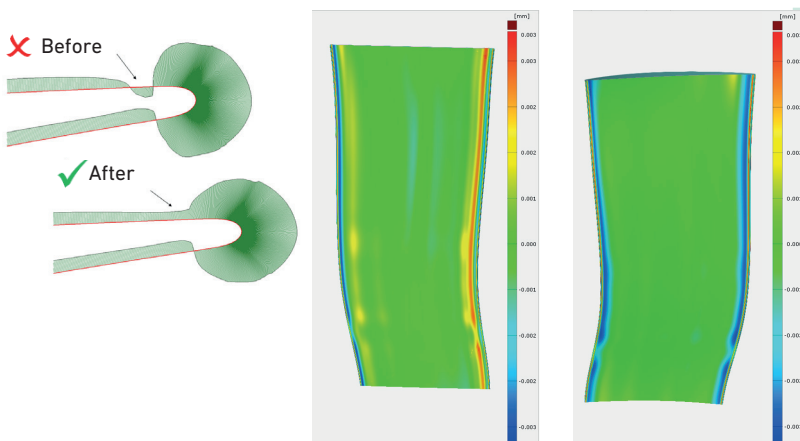

This includes the following:

- Analyze the curvature of your blade geometry sections
- Find and eliminate unnecessary reversal points
- Create a closed, uniform parametrized single surface

You will receive the optimized blade geometry with an error comparison, based on your original surface.

The new surface can be delivered either in the Parasolid or IGES format.
